

Submission Summary

Conference Name	7th International Conference on Data Science and Applications
Paper ID	1997
Paper Title	AI MEETING MOMENT ASSISTANT
Abstract	Artificial Intelligence (AI) has significantly transformed the way meetings are conducted and analyzed in modern digital environments. With the increasing volume of virtual meetings, extracting meaningful insights manually has become time-consuming and inefficient. AI-based meeting moment detection focuses on automatically identifying key moments such as decisions, action items, important discussions, and questions from meeting transcripts or audio data. This study explores the application of Natural Language Processing (NLP) and deep learning techniques for detecting such critical moments. Various models, including transformer-based architectures and traditional machine learning approaches, are evaluated for their performance. The system processes meeting data by segmenting conversations and classifying them into meaningful categories. Experimental results demonstrate that advanced AI models provide higher accuracy and contextual understanding compared to conventional techniques. Additionally, the study highlights the trade-off between computational cost and detection performance. The proposed approach aims to enhance productivity by summarizing meetings efficiently and reducing information overload. This research contributes to the development of intelligent meeting assistants for real-world applications. Future work includes integrating multimodal data such as voice tone and facial expressions for improved detection accuracy.

Submission Questions Response

1. Conflict of interest

The authors declare no conflict of interest and all authors are aware of this submission. In case of any conflict submitting author will be responsible.

Agreement accepted

2. Status of using third-party material in your article.

Third party content is defined as any material within the manuscript which is not your original work. Third party content may consist of text passages, figures, photos, screenshots, etc. and be found in many places such as but not limited to - the Internet, print and online books and articles, theses, annual reports, conference material, photocopies, course packages, translations, visually impaired readers. In particular, pay close attention to sensitive images such as identifiable persons or human research participants, recognisable architecture, logos, brands/trademarks, and images from online photo libraries. Please refer to Springer Nature Guide to Copyright and Permissions for further guidance. You are responsible for clearing the rights for third party content under your publishing agreement. Please confirm if your manuscript contains any third-party content?

I am not using third-party material for which formal permission is required.

3. Certificate of originality

This is to certify that my submitted research paper is an outcome of my research work. I have duly acknowledged all the sources from which the ideas and extracts have been taken. The submitted paper is free from plagiarism and has not been submitted elsewhere for publication. I am aware that the publisher/conference organizer can reject it at any publication stage if it is found to be plagiarized or machine-generated (AI-Generated).

Agreement accepted

4. Corresponding Author's Contact number

Please provide the Contact number of the Corresponding Author, including the Country code.

9815982784

5. Country Name

Please provide the Name of the country where most authors belong.

INDIA

6. Authors Contributions

Please specify individual authors' contributions in the research as recommended by the Committee on Publication Ethics (COPE).

(e.g. , study conception and design: Author_1, Author_2; data collection: Author_2; analysis and interpretation of results: Author_1, Author_2, Author_3; draft manuscript preparation: Author_2. Author_3. All authors reviewed the results and approved the final version of the manuscript.)

An author name can appear multiple times, and each author name must appear at least once. For single authors, use the following wording:

The author confirms sole responsibility for the following: study conception and design, data collection, analysis and interpretation of results, and manuscript preparation.

MANISH YADAV

7. Conference Rules and Guidelines

*I am agree with Conference Rules and Guidelines given at
https://scrs.in/conference/icdsa2026/page/Conference_Rules_and_Guidelines*

Agreement accepted
